

# Artist Statement

*for M. D. Friedman*

## *Artscapes: The Aspen Series*

M. D. Friedman's work represents an evolution for the artist from capturing (through photography) what is beautiful and unique in our world to expressing (through the digital enhancement) the beautiful and unique within oneself. The resulting works are sometimes startling, sometimes subtly intriguing, but all map the personal journey of the artist from photographer to poetographer, from collector to creator and from seeing to being. It is the artist's hope that the joy and self-discovery intrinsic to this work is contagious to the viewer.

The selections for this exhibit are M. D. Friedman's digital interpretations of Colorado Aspenscapes and represent some of the first pieces from his new collection of works called *Artscapes: the Aspen Series*. Signed giclee prints from this collection are available on watercolor paper or canvas in variety of sizes directly from the artist. *Aspen Fog* is also being featured this year at the POD Gallery in New York City. Please see [www.mdfriedman.com](http://www.mdfriedman.com) for more information.
